Indeed, Riley suggests that Sydenham, like Hippocrates,
identified five phenomena as probably important aetiological
elements behind manifestations of disease: heat, cold,
moisture, dryness and emanations from the earth and from
pathological matter, whether human, animal or inanimate.
Berwick, for example, criticised the Bengal authorities for
their cost-ineffectiveness soon after arrival from England in
Race, Science and Medicine, 1st Edition Waltraud Ernst, Bernard Harris Marc
Though many of the arguments against classical monogenism
remain in the edition, the sentence quoted here is omitted.
See Lyons, The Colonial Disease, pp. French and A. A great deal
has been written in modern books on pathology about the
difficulty of Further, frequent discussions among members of
the Bengal Medical Board and government 1700-1960 (Routledge
Studies in the Social History of Medicine) in India and
Britain bear witness to the versatility of racial and class

categories and the concomitant course of inclusion and exclusion during the nineteenth century.
