This bidirectional influence characterizes all pairs of elements or steps in the model, reflecting our view that the connections between science and practice are neither unidirectional nor linear. This is called the neural tube which later gives rise to the brain, the spinal cord, and the telencephalon, which eventually encompasses the two lateral ventricles, which in turn develops into the areas of the brain known as the basal ganglia and the limbic system [ 2 ].  
Temperament is influenced over time by heredity, maturational processes, and environment.
